Here for the first time is pronounced the judgment of Prince Otto marck on the world war. The maker of modern Germany, writing as an nwilling prophet twenty years before the murder of Sarajevo, fixes the culability on William II. The Iron Chancellor foresaw the calamity with unrring prescience, and the arraignment is contained in the suppressed third olume of his memoirs.

For Bismarck, harmony between Germany and Russia was the guaranec of lasting world peace; for him, the lapse of the alliance between the eighboring monarchies meant inevitable disaster. The longer the disaste ould be deferred, he foreboded, the more terrible it must be.

That is the real message of the foriden book "Had I remained," narck seems now to be telling the Ge man people, "the Russian treaty could not have lapsed. Had I remained, the "Had I remained!" And he covers the 180 pages of the volume with skilful narrative of how it came that he did not remain. In form h is a narrative, n purpose a polemic. But it was meant to be an address from his fresh grave to a young Emperor's subjects, a warn-ing, an apprisal, a veteran's analysis of a monarch's character. It was not to have been a verdict, sealed until after the fulfilment of the foreboding. Bis marck's message becomes tragic, no by his volition but through the machina-tions of the Kaiser's clique, of even the Chancellor's own heirs. For they it wa who delayed the publication until evi

prophecy made true. The message now comes to the light through a channel which no law can close. The third volume is still unpub-lished, but a resume of its contents has been made by a prominent German who has read it and who writes what it conare her relations with the United tained. He introduces it with a review of the extraordinary proceedings by

England favored this, but Viscount Ishli immediately made it plain that he could not consent "so long as there are certain Powers outside the feague who are not bound by the conditions imposed upon its members." Japan, he added, was increasing her armaments in accordance with the already fixed programme, and would have to increase next year and possibly thereafter. Japan alone took this attitude, which made it more significant.

"Who prevents ft? Did perhaps William II, return from Paris a victorious in King that now with imperial voice he can forbid his mighty antagonist to judge him before his subjects? Kroener had been chosen years before by Bismarck as the publisher of his memoirs and had fixed upon the highest royalty

"The Bismarck family was so meagrely informed about the last great work of the aged Chancellor that Prince Herbert, the son, when Kroener soon after the father's death referred to the possibility of publishing the memoirs, said with naive surprise and alarm: olrs? Why, they never were fin ished!' Whereupon Kroener produced a book pfinted as correction copy for the Prince and displayed it to the astonished heir.
